The Algebra 1 adventure game, with a teacher portal

Free for students · in the browser, Chromebooks included, nothing to install · **play.mathbound.org**

MathBound is an Algebra 1 adventure game. Students sail a world of sky islands, one island for each chapter of their textbook, and win its battles by solving real Algebra 1 problems: equations and inequalities, functions and graphs, systems, exponents, polynomials and factoring, quadratics, radicals and data. Every foe asks its own kind of problem, and after a wrong answer the game shows the worked steps before play goes on.

Every battle is Algebra 1, and each foe asks its own kind of problem.

Graphs, tables and data displays are part of the fight.

What teachers get

- **Classes.** Add students by school email, by a class code they type in, or from a list of first names with printed sign-in cards.
- **Progress by skill.** Each student and each skill: what they have mastered, where they are stuck, and how long questions take them.
- **Assignments with due dates.** Pick the lessons, set the date, and see who has finished.
- **Matched to your textbook.** Choose your class's book and the game follows its chapters and lessons.

Matched to 20 textbooks: Algebra 1 and Math 1

Big Ideas Math (two editions) · Carnegie Learning · CPM Core Connections · CPS Skyline · enVision (two editions) · Eureka Math / EngageNY · Glencoe · HMH Into Algebra 1 · Holt McDougal Larson · Illustrative Mathematics (two editions) · Math Nation (Florida) · OpenStax · Pearson · Reveal · SpringBoard. Integrated Math 1: MVP Mathematics I · Open Up NC Math 1. No textbook? MathBound Standard follows the usual US order.

Free printable Battle Sheets for every chapter, with answer keys: **mathbound.org/printables**

Free for teachers and schools during the alpha

MathBound is in alpha: free for teachers and schools while it is.

The game, the teacher portal, progress reports and assignments, with nothing to pay and no card. Ask for a teacher account at **mathbound.org/teachers/#alpha**; we set it up and reply, usually within two school days. No student names or emails are needed to ask. Students play free, with no sign-up.

Privacy

- No ads, no tracking, and nothing sold. No messaging between students.
- Student data stays the school's.
- We sign the SDPC National Data Privacy Agreement (NDPA). Policy: **mathbound.org/privacy**
